

The following comments are in regard to other art made of record by the examiner.
U.S. Patent Number 5,446,724 (Tabe et al.) does not teach or suggest a header having a set of bits where each bit corresponds to a form of control for access to the entire data storage medium.

This application is considered to be in condition for allowance and such action is earnestly solicited.

Respectfully submitted,

by A. W. Winfield

Augustus W. Winfield
